

5 TOP TIPS FOR GETTING YOUR GARDEN READY FOR PLANTING

1. SITE IT RIGHT

It's all about location. your plants will need at least 6 hours of direct sunlight and be protected from harsh winds. Ensure there is a water source close by and that your soil drains adequately.

2. CLEAN UP & MAINTENANCE

Before you start planting clean up the area and ensure you have all the tools required for working the soil. You will need:

3. START SEEDS INDOORS

Plant seeds in small plant pots - if you do not have a greenhouse choose a warm, sunny spot in your home. Move the plants into the garden once the seeds have grown x

4. WORK THE SOIL

Once the soil is dry, start breaking it up and add compost. Invest in soil that is nutrient-rich and well-drained, achieve this by mixing 3 inches of existing soil.

5. CREATE A PLANTING CALENDAR

Check seed packet instructions to help you decide when to plant seeds and draw up a schedule.
